┢ File Gallery

File Galleries enable secure and efficient uploading, storage, downloading and other serving of all types of files including images, videos, podcasts, text and PDF documents and more. Various views of files are possible such as lists, thumbnails and page views. Simple wiki syntax enables displaying files in wiki pages, articles, blog posts and so on, for individual files or multiple files such as in an image slider. A Tiki site can use either the standard Tiki interface or elFinder interface.

Overview

This page and linked-to pages describe how to configure and use the File Gallery feature.

To access

Click the **File Gallery** icon **for an end** on the Admin Panel or Access http://example.org/tiki-admin.php?page=fgal

Note

Maximum file name size in file galleries is 80 characters. The name may be truncated without warning if the file name is longer than 80 characters.

File Galleries

The file galleries feature can be a site repository or download manager for all types of files: images, video, audio, podcasts, text, software (releases, patches, docs), etc., etc. Files uploaded into file galleries can easily be displayed or linked from wiki pages, articles, blog posts, and other content.

File galleries are created and configured through the admin interface. Use the permissions system to specify who can create galleries, upload, download and delete files, etc. Statistics are kept of each download. You can produce stats for the most downloaded files, most visited file galleries and last uploaded files. Files can be replaced with a new version, with archived versions still available.

Key features

- Virtual folders and sub-folders with permissions
- File Gallery Direct Mapping
- Archives are kept (previous versions of a file can still be accessed).
- Check-in / check-out / lock
- Files can be in one or many categories.
- Workflows with Category Transitions
- WebDAV access
- Drafts
- Search within files
- $\bullet\,$ Web-based editing of SVG and ODF files
- Watch function enables email notification of changes.
- Provide a secret link via e-mail for a read-only access to a normally restricted file
- OCR Indexing
- unoconv support

Highlighting some File Gallery improvements

elFinder has been integrated to allow managing files in file galleries. Please see: elFinder

Once the feaure "elFinder" is enabled sitewide in the admin panel for file galleries, then you will have the option to choose Finder view in each file gallery:

1

You will also be able to set the new "Finder view" as the default one per file gallery, through the interface to change the "display properties":

I	Edit Gallery: Public documents 🛛 🍃 🎤

	the preference globally first.							
	Default View: Finder	view T						

Click to expand

The elFinder view allow you have many contextual actions if you right click with the mouse pointer on a file:

Click to expand

Moreover, you will be able to drag and drop files from one file gallery to others:

Click to expand

And you will be able also to drag some files from your local desktop in your own computer, and drop them inside the file gallery of your choice:

Click to expand

Last, you will be able to display files in a detailed view, sort them by many criteria, like by file types:

WebODF has been integrated to support the viewing and editing of Open Document Format (ODF). Please see: Docs.

Earlier improvements

- Wiki pages and user files can be stored in the file gallery. Also SVG editing is available via Draw.
- File in file galleries can have drafts, like Wiki pages.

- File galleries can be accessed via WebDAV.
- File galleries can also support image galleries, with image browsing, and dynamic insertion of wiki syntax to add an image to a wiki page.

File Gallery to produce image galleries

File galleries have been improved in a way that they can handle images also, and act *de facto* as image galleries, or podcast galleries, etc., with added features on them. This is to end up in newer tiki releases reducing code duplication between file galleries and image galleries, and users confusion on where to save and find files (whatever type they are). In the same way, in later Tiki releases, file galleries might also handle file attachments to wiki pages, ...

File Gallery diaporama

Improved file gallery diaporama.

Moreover, File galleries are closer to replace image galleries, since they include most (if not all) the previous functonality from image galleries, and benefit from the improvements in the file galleries.

×

Examples:

New file types recognized by tiki

New file type icons have been added to file galleries in order to recognize and visualize them accordingly. They include: .7z, .flv, .mp4, .odg, odp, .ods, .odt, .ogm, .ogv, .svg.
