Google Maps Admin

Google Maps icon

[Google Map](#) feature can be enabled through "**Admin home > Features > Google Map**".

It can be initially set up for the whole Tiki through "**Admin home > Google Maps**" (**tiki-admin.php?page=gmap**).

First time, it will recognize that you don't have any Google Map key for your specific web site domain (required), and it will suggest you to request one at:

<http://www.google.com/apis/maps/signup.html>

Once you complete the process in the Google site side, you can come copy the generated key to the corresponding field in **tiki-admin.php?page=gmap**. Once done, you will be able to see your map below, like this:

http://www.google.com/apis/maps/signup.html'. Below this is a 'Google Map Key:' field with a text input containing a long alphanumeric key. Underneath are three fields: 'Default x for map center:' with the value '1.0900497436523438', 'Default y from map center:' with the value '41.52682878717628', and 'Default zoom level:' with a dropdown menu set to '12'. A 'Save' button is located below these fields. At the bottom of the page is a map showing a geographical area with labels for 'Maldá', 'Sant Martí de Maldá', 'Sant Martí de Riucorb', 'Nalec', 'Ciutadilla', and 'Rocafort de Valbona'. The map includes navigation controls (directional arrows, zoom in/out, and a compass) and three map style buttons: 'Mapa', 'Satèl·lit', and 'Híbrid'."/>
