## To Access

From the [Features](#) page, click the **Interface** tab.

| Option                          | Description                                                                                                                      | Default  |
|---------------------------------|----------------------------------------------------------------------------------------------------------------------------------|----------|
| Element Plus                    | Use Element Plus Vue based UI elements 🧪                                                                                         | Disabled |
| Autocomplete                    | Provides various dropdown menus on many text input boxes for page names, user names, groups, tags, etc.                          | Disabled |
| Clearable Select                | whether select can be cleared                                                                                                    | Disabled |
| Collapsible Tags                | whether to collapse tags to a text when multiple selecting                                                                       | Disabled |
| Max Collapse Tags               | max tags to show when collapsed                                                                                                  | 3        |
| Filterable Select               | whether select can be filtered                                                                                                   | Disabled |
| Allow Create                    | whether creating new items is allowed                                                                                            | Disabled |
| Sortable                        | whether selected items can be re-ordered via drag and drop                                                                       | Disabled |
| <a href="#">Autocomplete</a>    | Provides various dropdown menus on many text input boxes for page names, user names, groups, tags, etc. 🗑️                       | Enabled  |
| <a href="#">Reflection</a>      | Creates a reflection under an image. Used in Plugin Img with the parameter "class=reflect"                                       | Disabled |
| SmartMenus                      | Add "SmartMenus" to Bootstrap menus. See <a href="http://smartmenus.org">smartmenus.org</a> for more.                            | Enabled  |
| SmartMenus collapsible behavior | Parent items behavior in collapsible (mobile) view.<br>☰ Default   Toggle   Link   Accordion   Accordion toggle   Accordion link | Default  |
| SmartMenus open/close on click  | Use mouse clicks to open/close item/sub menus                                                                                    | Disabled |
| <a href="#">TagCanvas</a>       | TagCanvas is a Javascript class which will draw and animate an HTML5 canvas-based tag cloud.                                     | Enabled  |

| Option                         | Description                                                                                                                                                                                                                                                                                                                                                                          | Default  |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| jQuery UI theme                | jQuery UI theme. Used in some modal popups and in the TikiSheet feature, etc. 🖌️<br>☰ None   black-tie   blitzer   cupertino   dark-hive   dot-luv   eggplant   excite-bike   flick   hot-sneaks   humanity   le-frog   mint-choc   overcast   pepper-grinder   redmond   smoothness   south-street   start   sunny   swanky-purse   trontastic   ui-darkness   ui-lightness   vader | Flick    |
| jQuery UI                      | Include jQuery UI library. Enables a number of interface features.<br>⚠️ <i>This feature is required for the interface for many features to work properly.</i>                                                                                                                                                                                                                       | Enabled  |
| Validation                     | Provides various validation possibilities such as for trackers.                                                                                                                                                                                                                                                                                                                      | Enabled  |
| jQuery zoom                    | Enables zoom in images on mouseover or click. Used in Plugin Img with the parameter "thumb=zoombox"                                                                                                                                                                                                                                                                                  | Disabled |
| jQuery Select2 Select Boxes    | Styled replacement for dropdown select lists and multiple-select inputs.                                                                                                                                                                                                                                                                                                             | Enabled  |
| Sortable Select2 Multi-selects | Enable drag and drop re-ordering of Select2 multi-select options.                                                                                                                                                                                                                                                                                                                    | Disabled |
| FitVids.js                     | jQuery plugin for fluid-width (responsive) embedded videos.                                                                                                                                                                                                                                                                                                                          | Disabled |
| FitVids.js additional domains  | Youtube and Vimeo are supported by default. Also apply FitVids.js to videos from these domains.                                                                                                                                                                                                                                                                                      | None     |
| jQuery Timeago                 | jQuery plugin for fuzzy timestamps.                                                                                                                                                                                                                                                                                                                                                  | Disabled |
| jQuery Double Scroll           | jQuery plugin which adds an extra horizontal scroll bar at the top.                                                                                                                                                                                                                                                                                                                  | Disabled |
| Allow image lazy loading       | Allow that images are loaded in a lazy way                                                                                                                                                                                                                                                                                                                                           | Disabled |
| Prefix CSS                     | Use -prefix-free JavaScript library to add vendor specific css prefixes.<br>⚠️ <i>May be replaced by a server-side option soon.</i> 🏠                                                                                                                                                                                                                                                | Disabled |
| jQuery infinite carousel       | Create a slideshow (like an image carousel) for file galleries. Used in Plugin Carousel.                                                                                                                                                                                                                                                                                             | Disabled |
| jQuery sortable tables         | Provides an interactive way to sort and filter data in tables produced with Plugin FancyTable and Plugin TrackerList, as well as administrative tables.                                                                                                                                                                                                                              | Disabled |

| Option                 | Description                                                                                                                                         | Default                    |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| Enable Vue.js          | Loads the vue.js library. 🛠️                                                                                                                        | Enabled                    |
| Always Load Vue.js     | Loads the vue.js library for every page.                                                                                                            | Enabled                    |
| Vue.js Deployment Mode | Selects which vue.js library is used.<br>☰ Production full (minified)   Production runtime (minified)   Development full   Development runtime only | Production full (minified) |
| Tracker Field Rules    | Conditional rules for tracker fields.<br>⚠️ <i>Experimental new feature, expect some issues.</i> 🛠️                                                 | Enabled                    |

| Option                          | Description                                                                                                                                                                                                                                                                      | Default  |
|---------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| Ajax                            | Allows for efficient retrieval and display of information from the server, thus improving the user experience. This feature is required for the interface for many features to work.<br>⚠️ <i>This feature is required for the interface for many features to work properly.</i> | Enabled  |
| Ajax auto-save                  | Save content during editing, enabling work to be recovered after any interruption. Also enable a real-time preview. This option is required for WYSIWYG plugin processing.                                                                                                       | Enabled  |
| Autocomplete                    | Provides various dropdown menus on many text input boxes for page names, user names, groups, tags, etc.                                                                                                                                                                          | Enabled  |
| Reflection                      | Creates a reflection under an image. Used in Plugin Img with the parameter "class=reflect"                                                                                                                                                                                       | Disabled |
| SmartMenus                      | Add "SmartMenus" to Bootstrap menus. See smartmenus.org for more.                                                                                                                                                                                                                | Enabled  |
| SmartMenus collapsible behavior | Parent items behavior in collapsible (mobile) view.<br>☰ Default   Toggle   Link   Accordion   Accordion toggle   Accordion link                                                                                                                                                 | Default  |
| SmartMenus open/close on click  | Use mouse clicks to open/close item/sub menus                                                                                                                                                                                                                                    | Disabled |
| Tooltips                        | Enable tooltips such as this to have a custom appearance, styled by CSS.                                                                                                                                                                                                         | Enabled  |
| TagCanvas                       | TagCanvas is a Javascript class which will draw and animate an HTML5 canvas-based tag cloud.                                                                                                                                                                                     | Enabled  |
