

## Module "menupage"

This [module](#) will display the content of any wiki page as a [menu](#) in the left or right column or in any other place that a module can be located.

- This type of menu is used as the upper left menu in [dev.tiki.org](http://dev.tiki.org) for example.

You can also use this module in the center (main) column.

- See [Happy Scroll theme](#) for details.

## Parameters

Displays a Wiki page.

Required parameters are in **bold**.

[Go to the source code](#)

Preferences required: feature\_wiki

Parameters	Accepted Values	Description	Default	Since
<code>pagemenu</code>	pagename	Page to display in the menu. Example value: HomePage.		
<code>menu_class</code>	text	Class of the menu container		
<code>menu_id</code>	text	Id of the menu in the DOM		
<code>menu_type</code>	alpha	Display the page as a menu (horiz / vert)		
<code>use_namespace</code>	int	Prepend the default namespace to the page name for localized menus per workspace (1/0)	0	

## Usage

On the page [Admin > Modules](#) (`tiki-admin_modules.php`)

- Assign a new module
- Choose the module "menupage" from the drop-down list.

The module will have the same title as the wiki page.

You can assign this "**menupage**" to any module zone (See [Module Admin](#) page if needed, or you can include it within a wiki page, using the [PluginModule](#)).

# Example

Imagine you have a page called ))SideMenu(), with this content:

```
(:arrow:) [tiki-index_raw.php|Home Page] (:arrow:) [tiki-lastchanges.php|Last changes]
(:arrow:) [tiki-view_forum.php?forumId=1|Forum Wiki-translation] "[tiki-
editpage.php?page=SideMenu|edit]"
```

The wiki page itself looks like this:

The screenshot shows a wiki page with the title "SideMenu". At the top right are edit and backlinks buttons. Below the title is a sidebar menu with three items: "Home Page", "Last changes", and "Forum Wiki-translation", each preceded by a yellow arrow icon. Below the sidebar is a link labeled "edit". At the bottom of the sidebar are three buttons: "edit", "history", and "translation".

Then, the module **menupage**, like all modules, can be assigned to a group of users.

The assigned module looks like this:

The screenshot shows a wiki page titled "Welcome to Wiki-Translation". On the left, there is a welcome message and a section titled "Information about this community" with a list of links. On the right, there is a "Login" form with fields for user and pass, and a "login" button. Below the login form is a "Remember me" checkbox and links for "register" and "I forgot my password". A "SideMenu" sidebar on the right contains the same three items as the previous screenshot: "Home Page", "Last changes", and "Forum Wiki-translation", each preceded by a yellow arrow icon. Below the sidebar is a link labeled "edit". At the bottom right is a "Skype Chat" section.

You can see this example live in <http://www.wiki-translation.com>

For more advanced menus, see "Menu" feature.
