Plugin Copyright

This wiki plugin inserts a copyright notice based on the copyright property for the page.

Parameters

Insert copyright notices

Introduced in Tiki 1.

Go to the source code

Preferences required: wiki_feature_copyrights, wikiplugin_copyright

Parameters

(body of plugin) - Pattern for display of the copyright information. May contain ~title~, ~year~, ~authors~ and ~holder~.

no parameters

Requirements

Before the plugin can work, you'll need to:

- 1. Go to Control Panels > Features > Experimental (tab) and check Copyright to turn on the copyright feature
- 2. Go to *Control Panels > Copyright* and check *Wiki* or whichever feature you want to display the copyright for
- 3. For the page you want to display the copyright for, click on *Edit* to edit the page and then complete the copyright information (title, year, authors) this is under the *Properties* tab starting with version 4. See Copyright for more information.

Once above is done, entering <code>~title~</code>, <code>~year~</code>, or <code>~authors</code> in the body of the plugin will cause those copyright elements for the page to display. For example, <code>~title~</code> will correspond to the title you entered in the 3rd step above, etc.

Example

Let's assume that you've entered the following copyright information for a page:

Title: Tikiwiki Documentation

Year: 2010

Authors: Tikiwiki community

Then using this code on that page:

{COPYRIGHT()}~title~ is copyrighted ~year~ by the ~authors~{COPYRIGHT}

Would produce:

Tikiwiki Documentation is copyrighted 2010 by the Tikiwiki community Edit copyrights for HomePage
