

Plugin Fancy List

Use this [wiki plugin](#), introduced in [Tiki3](#), to produce a fancy looking numbered list.

Parameters

Create a formatted numbered list

Introduced in Tiki 3.

[Go to the source code](#)

Preferences required: `wikiplugin_fancylist`

Parameters	Accepted Values	Description	Default	Since
(body of plugin)		One item per line starting with anything followed by ")".		
<code>class</code>	text	CSS class for the fancylist		3.0
<code>div</code>	(blank) 1 0	Use the HTML div tag instead of the HTML ordered list tag (ol)		3.0

Example

In this example, additional formatting is applied to the items in the list: the double single quotes (`"`) to produce italics, and the two underscores before and after the words (`_`) to make the font bold. See [Wiki Syntax](#) for more information on text formatting.

This code,

```
{FANCYLIST()} "Antiquity" "Middle Ages" "Renaissance" "Age of Enlightenment" "Romantic Era" "20th Century" "Present Day" {FANCYLIST}
```

Would produce:

1. ***Antiquity***

2. ***Middle Ages***

3. ***Renaissance***

4. ***Age of Enlightenment***

5. ***Romantic Era***

6. ***20th Century***

7. ***Present Day***
