

# Plugin Group

Use this [wiki plugin](#) to display content based on the user's [groups](#) or friends. It is similar to [PluginPerm](#).

## Parameters

Display content based on the user's groups or friends

*Introduced in Tiki 1.*

[Go to the source code](#)

*Preferences required:* `wikiplugin_group`

Parameters	Accepted Values	Description	Default	Since
(body of plugin)		Wiki text to display if conditions are met. The body may contain <code>{ELSE}</code> . Text after the marker will be displayed to users not matching the conditions.		
<code>friends</code>	username	Pipe separated list of users whose friends are allowed to view the block. Example: <code>admin johndoe foo</code>		4.0
<code>groups</code>	groupname <i>separator:</i> <code> </code>	Pipe separated list of groups allowed to view the block. Example: <code>Admins Developers</code>		1
<code>notpending</code>	groupname <i>separator:</i> <code> </code>	User allowed to view block if membership in the group (or pipe-separated list of groups) is not pending.		13.0
<code>pending</code>	groupname <i>separator:</i> <code> </code>	User allowed to view block if membership payment to join group (or pipe-separated list of groups) is outstanding.		13.0
<code>notgroups</code>	groupname <i>separator:</i> <code> </code>	Pipe-separated list of groups not allowed to view the block.		1

## Notes on usage

- The `{ELSE}` part is optional.
- The `groups` and `notgroups` parameters may be used at the same time.
- Groups can be included in other groups, and this can impact how this plugin behaves. For example, if you want a section to be seen by the group A and the group Admins (`groups="Admins|A"`), and not by group B (`notgroups="B"`), be careful not to include group B in the Admins group. If Admins includes A and B, Admins will not see the section.

## Examples

### Basic syntax

```
{GROUP(groups="Registered|Admins" notgroups="Editors")}show this content for users included/excluded from groups specified in the parameters{ELSE}otherwise show this content{GROUP}
```

## Security

Use of this plugin to hide sensitive information will not prevent it from being revealed to users with permissions to view or edit the page source. Users that have a Watch on the wiki page will receive an email with the entire wiki page source, thus revealing the information regardless whether the content would be hidden because of this plugin.
