

# Plugin Report

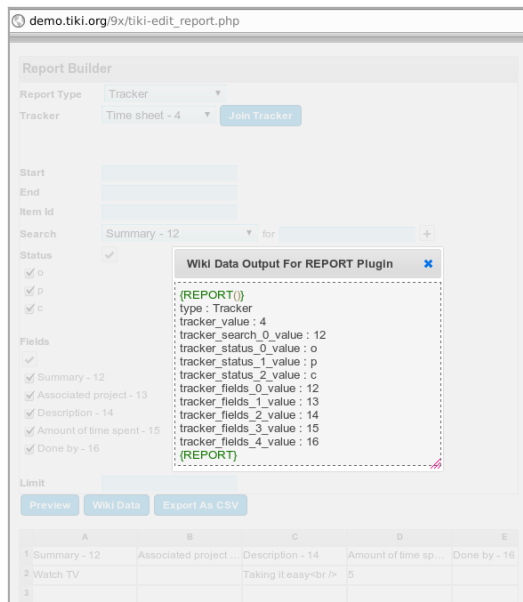

Introduced in [Tiki9](#), use this [wiki plugin](#) to build a [Report](#), store it in a wiki page, and edit it from the page itself.

# Parameters

Tiki Doc From Code error: reportplugin not found

# Examples

Example of code to use for a report, generated from the edit report interface:

The screenshot shows the 'Report Builder' interface in a browser window titled 'demo.tiki.org/9x/tiki-edit\_report.php'. The interface includes a 'Report Type' dropdown set to 'Tracker', a 'Tracker' dropdown set to 'Time sheet - 4', and a 'Join Tracker' button. Below these are fields for 'Start', 'End', and 'Item Id'. A 'Search' dropdown is set to 'Summary - 12'. There are checkboxes for 'Status' (checked), 'o', 'p', and 'c'. A 'Fields' section has checkboxes for 'Summary - 12', 'Associated project - 13', 'Description - 14', 'Amount of time spent - 15', and 'Done by - 16'. A 'Limit' field is present. At the bottom are 'Preview', 'Wiki Data', and 'Export As CSV' buttons. A table is partially visible at the bottom with columns A, B, C, D, and E. A modal dialog box titled 'Wiki Data Output For REPORT Plugin' is open, displaying the following PHP code:

```
;(REPORT);
;type : Tracker
;tracker_value : 4
;tracker_search_0_value : 12
;tracker_status_0_value : o
;tracker_status_1_value : p
;tracker_status_2_value : c
;tracker_fields_0_value : 12
;tracker_fields_1_value : 13
;tracker_fields_2_value : 14
;tracker_fields_3_value : 15
;tracker_fields_4_value : 16
;(REPORT)
```
