Plugin Tracker Item Copy

Introduced in Tiki7

Use this wiki plugin to copy a tracker item.

Parameters

Copy a tracker item
Introduced in Tiki 7. Required parameters are in `bold`.

Go to the source code

Preferences required: wikiplugin_trackeritemcopy, feature_trackers

Parameters	Accepted Values	Description	Default	Since
`copyFieldIds`	text *separator:* `|` `:`	Field IDs to copy old value of, separated by `:`, joined fields separated by `|`		7.0
`linkFieldIds`	text *separator:* `:`	Fields links that are related to this tracker that you would like to join on, separated by `:`		8.0
`trackerId`	text *separator:* `:`	Tracker from which to copy item, joined tracker ids separated by `:`		7.0
`copies_on_load`	int	Set the number of copies to make on load of plugin automatically		7.0
`itemId`	text	ID of item to make copy of, otherwise input is asked for		7.0
`return_array`	text	If Yes (`y`), returns array of new information instead of displaying results to screen, used in non-interactive mode		7.0
`updateFieldValues`	text *separator:* `|` `:`	New values to replace for the field IDs specified, separated by `:`, joined fields separated by `|`. `randomstring` will generate random string; and `f_xx` to use value of field xx of itemId		7.0
`updateFieldIds`	text *separator:* `|` `:`	Field IDs to update with new values specified, separated by `:`, joined fields separated by `|`		7.0

Note: Will not work with category or certain special fields, copies only data from specified fields.
