

Rating Tracker Field

This is a [stub](#)

Introduced in [Tiki8](#), this is the corresponding tracker field to the feature [Rating](#) and [Advanced Rating](#).

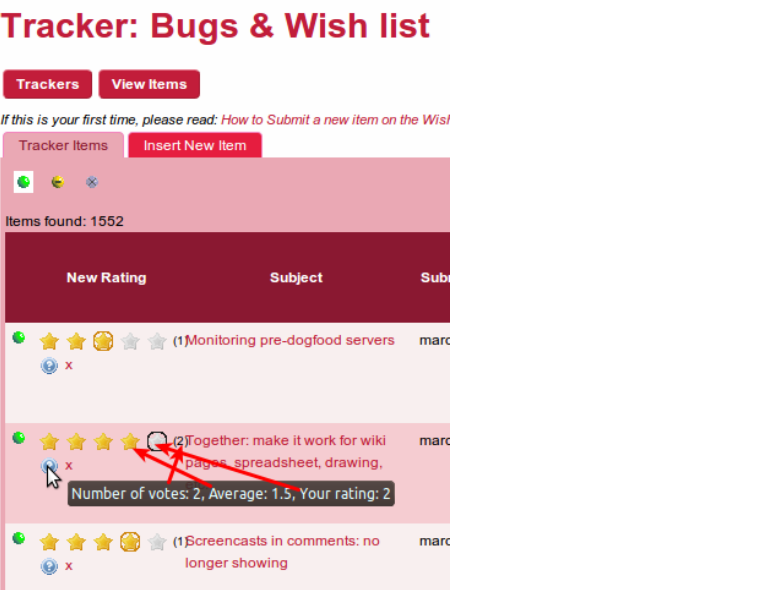

In [Tiki12](#), at least, you have 3 modes:

- Stars
- Radio Buttons
- Single option: e.g. Like

You can also set the labels to something else different from the real values that will be stored for the calculation of average, etc.

In this example, below, the tracker field Rating was set with:

- Option: -2,-1,0,1,2
- Mode: Stars
- Labels: -2,-1,0,1,2

The screenshot shows a web interface for a 'Tracker: Bugs & Wish list'. At the top, there are buttons for 'Trackers' and 'View Items'. Below that, a link says 'If this is your first time, please read: How to Submit a new item on the Wish'. The main content area has a search bar and a table of items. The table has columns for 'New Rating', 'Subject', and 'Subj'. Three items are visible:

New Rating	Subject	Subj
(1) Monitoring pre-dogfood servers	Monitoring pre-dogfood servers	marc
(2) Together: make it work for wiki pages, spreadsheet, drawing.	Together: make it work for wiki pages, spreadsheet, drawing.	marc
(1) Screencasts in comments: no longer showing	Screencasts in comments: no longer showing	marc

A tooltip is shown over the second item, displaying: 'Number of votes: 2, Average: 1.5, Your rating: 2'. The tooltip also shows a star rating of 2 out of 5.
