

Tiki Manager Package

Starting in [Tiki25](#), [Tiki Manager](#) can be added as a [Package](#) to any Tiki instance. It has many uses, including [Automatic updates](#). This replaces the standalone [Tiki Manager Web UI](#) with something more robust and flexible.

Command Line

```
2022-04-15 14:33:30
When the Tiki Manager Package is installed, these commands appear in
php tiki-console.php

gallery_migrate Migrate images from the Image Gallery to the File Gallery
goal Check goal progress and assigns rewards.
index Incremental indexing.
index_rebuild Fully rebuild the unified search index
installer Disable the installer
list_messages Perform a Plugin ListMessages command on a particular page
mail_queue Read the mail-in messages
mail_queue_send Send the messages stored in the Mail Queue
manager_backup_delete Delete backup folder

manager_database_clear Delete database
manager_database_view View database
manager_instance_remove Remove access to instance
manager_instance_backup Backup instance
manager_instance_clone Create a new blank instance
manager_instance_check Check instance
manager_instance_clone Close instance
manager_instance_cloneandupgrade Clone and upgrade instance
manager_instance_copy Copy Tiki contents
manager_instance_copysshkey Copy SSH key
manager_instance_create Create a new instance (or take over an already installed Tiki)
manager_instance_delete Delete instance connection
manager_instance_delete Delete Tiki branch or tag
manager_instance_edit Edit instance
manager_instance_export Export instance
manager_instance_import Import instance
manager_instance_list List instances
manager_instance_list_instances_under_maintenance Instances under maintenance
manager_instance_patch_apply Apply a patch of Tiki source or 3rd party vendor source to an instance
manager_instance_patch_delete Delete a patch applied to an instance
manager_instance_patch_list List patches applied to an instance
manager_instance_profile_apply Apply profile to instance
manager_instance_restore Restore a failed installation
manager_instance_revert Revert instance state
manager_instance_setup_scheduler_error Stop instance's scheduler error
manager_instance_stat Fetch data (ex: KPIs) from instances.
manager_instance_update Update instance
manager_instance_upgrade Upgrade instance
manager_instance_verify Verify instance
manager_inst_folder Check Inst folder
manager_inst_requirements Check Tiki Manager requirements
manager_manager_info Show Tiki Manager info
manager_manager_report Remove reports
manager_manager_reset Reset Tiki Manager
manager_manager_setup_backup Backup (cron) Set-up a cronjob to perform instance backups
manager_manager_setup_clone [setup:clone] Set-up a cronjob to perform instance clone
manager_manager_setup_update [setup:update] Set-up a cronjob to perform instance update
manager_manager_setup_watch Set-up cron job to perform hash checks
manager_manager_update Update Tiki Manager
manager_tiki_versions List Tiki versions
manager_webmanager_block Block webmanager login related process
manager_webmanager_enable Activate Tiki Manager web administration
all_train Train a particular machine learning model
multitiki_list List Multitiki in a path
multitiki_move Move a Multitiki file from one tiki instance to another
notification Send out email notification digests.
```

Web Interface

As of 2022-07-05, this is functional in trunk, but for more interactivity and reliability, we will add support for [Realtime](#).

Back-end admin panel

See the [Tiki Manager](#) link in the admin menu (tiki-ajax_services.php?controller=manager&action=index). This is the full back-end interface

Tracker field

[Tiki Manager Tracker Field](#) is for when you want to have meta data associated to your instances, or if you want to launch Tiki instances from Tracker items.

Wiki Plugins

- [PluginTikiManager](#) is for when you want to present a simple user interface, with a subset of functionality.
- [PluginTikiManagerClone](#)
- [PluginTikiManagerUpdate](#)

Virtualmin

- If you connect to a Virtualmin instance, you get even more features:
<https://wikisuite.org/Tiki-Manager-Package-connecting-to-Virtualmin>

Development

- Initial code: https://gitlab.com/tikiwiki/tiki/-/merge_requests/1374
- Development ideas: [Tiki Manager within Tiki](#)
