Wiki settings

Panel settings are located in the Administration section of the Wiki. To access the settings, click on the Administration link in the top navigation bar. The settings are organized into several categories, including Wiki settings, Site settings, and User settings. The Wiki settings section includes options for generating and downloading dumps.

Dumps

Dumps are snapshots of the entire Wiki database. They can be used for backup, migration, or archival purposes. The Wiki settings page provides options to generate a new dump or download the most recent one. The dump files are stored on the server and can be accessed via FTP or SFTP.

Tags: A tag is a mark in the current state of the Wiki. They can be used to save the Wiki at regular intervals and to recover the whole Wiki to a particular state if something disastrous occurred. To create a tag simply enter a tag name and click the **create** tag button. To restore a tag select one of the existing tags and click **restore** (*all your Wiki pages will be lost and the saved state for the wiki will be restored!*). Since tags can take a lot of space you can remove tags that you don't want to use by clicking the **remove** tag button after selecting the tag that you don't want to use anymore.

Remove a tag

Remove a tag: A tag is a mark in the current state of the Wiki. They can be used to save the Wiki at regular intervals and to recover the whole Wiki to a particular state if something disastrous occurred. To create a tag simply enter a tag name and click the **create** tag button. The image shows two parts of a web interface. The top part is titled 'Wiki attachments preferences' and contains three options: 'Wiki attachments:' with a checked checkbox, 'Use database to store files:' with a selected radio button, and 'Use a directory to store files:' with an unselected radio button and an empty 'Path:' text box. Below these is a 'Change preferences' button. The bottom part is titled 'Wiki attachments' and features a search box with a 'find' button, a table with columns for User, Page, Name, Size, Type, Storage, and Created, and two buttons: 'Change all to db' and 'Change all to file'.

Field	Description
Wiki Attachements	Specify if files can be attached to wiki pages.
Use Database to Store Files	If selected, files that are attached to wiki pages will be converted to BLOBs and stored in the Tiki database in the tiki_wiki_attachments table.
Use a Directory to Store Files	If selected, files that are attached to wiki pages will be stored in the specified dirctory. The directory can be an absolute path (such as http://www.foo.bar/attachments/_) or relative to the Tiki installation directory (such as attachments/).
	Note: The trailing slash (/) is mandatory and <i>must</i> be included in the path.
Wiki Attachments	This area lists all current attachments. You can use this area to change an attachements storage location to either Database to File.
