update the theme and layout?

Posted by [mlpvolt](#) Thu 26 Jan, 2006 06:30 GMT-0000 posts: 5     

I've been chatting with Marc about the documentation project, and how i might pitch in.

I would like to float an idea about updating the doc.two theme and reorganizing the look and feel of the site to make it more user friendly.

- maximize the height of pages on the screen. the top bar is pretty empty, and if (like me you have a number of toolbars in your browser) you dont get much reading/ editing space on your screen.
- restack the left hand modules in this order:
 - menu (basic navigation, perhaps hiding some of the options.
 - search
 - want to write

- right hand
 - login
 - last changes
 - shoutbox

main priority is making the site navigable by newbies.
