toc broken in image galleries

Posted by [Rick Cogley](#) Sun 18 Jan, 2004 05:09 GMT-0000 posts: 10                                              

In Image Galleries Admin I used the recommended toc entry at the bottom, which I think is supposed to link back to the other related docs.

It does not work, and I think it has to do with the fact that I renamed the docs.

There was a slight grammar mistake in the name of the img gal docs, in that they were called "ImageS Galleries ..." so I removed the unneeded s's.

In the overall structure, the pages seem to be linked in correctly, but, somehow, I think I must have broke the toc function.

Can someone fix this?

Thanks and Cheers,
Rick
