??? Mod group should be a page for describing what's the mod group (available in Mods about.

Groups Management is the pages content that should be linked from Admin -> Group page, in my opinion, whereas this name doesn't help. I would think of "Groups", even if the page Groups already exists with rare content.

Feel free to move and/or rename pages to leave it the way you believe it should be..., if no more comments in this thread to your question.... (remember to leave a page with the old name, redirecting the new one, just in case)
